KOGI IRON SUCCESSFULLY REAPPLIES FOR EXPLORATION LICENCE

Kogi Iron Limited and its 100% owned Nigerian subsidiary KCM Mining (ASX: KFE, 'Kogi', 'the Company') are pleased to provide an update on its portfolio of exploration and mining licences for the Agbaja iron ore deposit, Kogi State, Nigeria.

Kogi has received final documentation from the Federal Republic of Nigeria, Ministry of Mines and Steel Development, granting Exploration Licence EL 28784, which replaces EL 16998.

EL 16998 was first approved in September 2015 and has been replaced by EL 28784 in the normal course of business.

Following this grant, KCM now holds 100% interests in Mining Leases ML24606, ML24607 and ML 25376; and retains Exploration Licences EL14847 and EL28784 where the Company plans to conduct additional exploration.

Don Carroll – Chairman of Kogi Iron Limited commented 'The maintenance of our mining leases and exploration permits is a key role of our management team at KCM Mining and it is pleasing to see the continuing positive results of this work'.

The Company will update shareholders as and when new significant information and results come to hand.

About Kogi Iron (ASX: KFE)

Kogi Iron Limited is a Perth-based company with the objective of becoming an African iron ore and steel producer through the development of its 100% owned Agbaja iron ore and steel project located in Kogi State, Republic of Nigeria, West Africa ("Agbaja" or "Agbaja Project").

Nigeria has substantial domestic demand for steel products, which is currently met largely through imports. The Agbaja project, located about 200km south of the Nigerian capital Abuja, opens the opportunity for domestic production of pig iron products.

The Company holds a land position which covers a large part of the Agbaja Plateau. The Agbaja Plateau hosts an extensive, shallow, flat-lying channel iron deposit with an Indicated and Inferred Mineral Resource of 586 million tonnes with an in-situ iron grade of 41.3% reported in accordance with the JORC Code (2012). This mineral resource covers approximately 20% of the prospective plateau area within ML24606 and ML24607.
