

QUARTERLY REPORT – SEPTEMBER 2015

Australian based iron ore development company, Kogi Iron Limited (ASX: KFE) (“Kogi”, “Kogi Iron”, or the “Company”) and its 100% owned Nigerian operating company, KCM Mining Limited (“KCM”) presents the quarterly activity report for the three months ended 30 September 2015.

Key activities by the Company during the quarter were:

Agbaja Project

During the quarter further adverse trading effects were felt by the international iron ore community.

This has led to further detailed review of future short term activities and the Company has undertaken a desktop review of iron making technologies, which will be utilised in the Bankable Feasibility Study which is scheduled to be finalised in Quarter 2, 2016.

Corporate

At the end of the quarter, the Company had cash at bank of approximately \$0.321 million.

At the date of this report the Company has 377,669,836 fully paid ordinary shares on issue and 102,704,606 ASX quoted options (exercise price \$0.08, expiry date 31 May 2017).

On 26 August 2015 the Company announced the resignation of Mr. Giuseppe (Joe) Ariti as a non-executive director.

Mineral Tenements

As at 30 September 2015, the following mineral tenements were held by KCM. All of the mineral tenements are located in the Federal Republic of Nigeria and KCM has a 100% interest in each tenement:

Exploration Licence 6350	Exploration Licence 9797
Exploration Licence 8583	Exploration Licence 12124
Exploration Licence 8886	Exploration Licence 12847
Exploration Licence 16998

About Kogi Iron (ASX: KFE)

Kogi Iron Limited is a Perth-based company with the objective of becoming an African iron ore producer through the development of its 100% owned Agbaja iron ore project located in Kogi State, Republic of Nigeria, West Africa ("Agbaja" or "Agbaja Project"). The Company has completed a Preliminary Feasibility Study which determined that the development and operation of a mine and processing plant at Agbaja to produce 5 Mtpa of iron ore concentrate is technically feasible, economically viable and socially and environmentally acceptable. Concentrate from Agbaja will initially be transported via river barge along the Niger River to the Gulf of Guinea and world export markets. The Company will continue to advance access and usage agreements for an existing under-utilised heavy haulage railway that runs from near the Agbaja Project to Port Warri. This existing railway remains an important part of a longer term transport solution for an expanded production profile.

In recent years Nigeria has sought to diversify its economy, which is dominated by hydrocarbons, into minerals and related industries. Nigeria is the largest country by population in Africa with a GDP growth rate of 7.2% in 2014. The country has very transparent and consistent mining regulations and very favourable fiscal terms for foreign investment in mining.

The Company holds a land position of approximately 400km² covering 16 tenements, with the main focus being EL12124 which covers a large part of the Agbaja Plateau. The Agbaja Plateau hosts an extensive, shallow, flat-lying channel iron deposit with an Indicated and Inferred Mineral Resource of 586 million tonnes with an in-situ iron grade of 41.3% reported in accordance with the JORC Code (2012). This mineral resource covers approximately 20% of the prospective plateau area within EL12124.

Forward-looking Statements

This announcement contains forward-looking statements which are identified by words such as 'anticipates', 'forecasts', 'may', 'will', 'could', 'believes', 'estimates', 'targets', 'expects', 'plan' or 'intends' and other similar words that involve risks and uncertainties. Indications of, and guidelines or outlook on, future earnings, distributions or financial position or performance and targets, estimates and assumptions in respect of production, prices, operating costs, results, capital expenditures, reserves and resources are also forward looking statements. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions and estimates regarding future events and actions that, while considered reasonable as at the date of this announcement and are expected to take place, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of our Company, the Directors and management. We cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and readers are cautioned not to place undue reliance on these forward-looking statements. These forward looking statements are subject to various risk factors that could cause actual events or results to differ materially from the events or results estimated, expressed or anticipated in these statements.

Competent Persons' Statements

The information in this announcement that relates to Mineral Resources at Agbaja is extracted from the ASX announcement entitled "Mineral Resources at Agbaja Increase 20% to 586MT includes an Indicated Resource of 466MT" and is available to view on www.kogiiron.com. The Company confirms that it is not aware of any information or data that materially affects the information included in the original market announcement and, in the case of estimated Mineral Resources or Ore Reserves, which all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
